

# Sello Meeting

6-14-22

What I would like:

Website -

Going to be using it as a potential API endpoint –later on

Also working on making sure that the CSS is up to professional standards

Once the styling is setup properly, then the information that is needed can be added

Frontend- Work on making sure that both the Business and User's accounts are similar in the way of styling

Adding a navbar that corresponds to the different things that they would add in each of the diff level of accounts

Overall -

Would like to make it so that we can register a business as well as register a user

Would like to be able to login to a user as well as log in to a user account

## **Backend:**

Has working so far

- Email verification
- Registering users
- Logging in users
- Documentation that will help people understand the backend(still a work in progress)
- The other things that were said (we were talking to fast about them) —basically alot

## **Frontend:**

- Merged the code from dev-bio into main
- Also added partial implementation with the backend

## **NOAH**

What is it that you are currently working on?

Custom text input/textbox errors

Making custom component

Backend stuff

Temporal storage

Implementing profiles

Timestamp:

Easier to add to their profile

Put code on the py

What are some of the other tasks that you think that you will need to work on

Profiles -> storing images financial data, adding tables

Making it easier to use raspberry pi

### **LUKE**

Finish up working on the questionnaires for the potential businesses and users

Working on the navigation bar setting up different versions for the different types of users

Each of the nav bars will have the corresponding things needed for each of the account types

### **EDDIE**

Working on

Outline is done

Finishing up CSS for the website

### **TEDDY**

Login show

Text input field help

### **TREVOR**

Make the flow of the register email/password

### **RYAN**

Working on the Documentation for the backend

(This will be helpful for the people that are trying to get into working on the backend)

If name is not bold caps then I either have not talked to you/ were not at the meeting ;)

Any Questions or concerns email or message Luke
