

# Sello Meeting

5-31-22

## **Website -**

2 Pages being done  
Css going to be looked at  
Chuggin along with that

## **Backend**

Working on the schema for the data setting up the processing side  
Raspberry pi has most of the code on there  
Github desktop setip on the rasp pi

w/ rasp pi you can connect to it  
Edit and load the code on it

## **Frontend**

Working on the user page once they get logged in  
Teddy business side page screen

Pushed business bio to set up for pr  
Take a look at that and make comments as necessary

## **Other**

-As stated from text during the week we need to make sure that we are making a document and log when you work with what it is that you have been working on. It is either a document or code and if it is code that you are working on, and it is pertaining to the front end then upload it to is own branch (being the same branch each time) that will hold the changes that you have been making

- Stories will be put up on the github organization project tab – the stories will be tagged with which of the areas that it will be effecting.
