

RoadMap

As of 5/24

End of June to early July:

Frontend

Business front end done

User frontend done

Start implementing

- uploading photos
- Messaging between User and Business -or- User being able to make application to a company for an item, Business seeing it and approving or denying(UI ELEMENT)

Website

Information is complete

Styles at least 75% to complete

Backend

Noah is handling backend

Late July to start of August

Frontend

Functionality should be mostly complete around this time

Tweaking visually

Website

Info should be complete

Styles up to standard

API tab created

API start developing to allow people to make requests

Backend

Noah is handling backend still lol

August - early September

APP

**At this point i would like to start early beta testing
*if all goes to plan***

This would be the first real deployment of the app
We will talk about our deployment options later on

This would be onboarding a couple of companies each with a couple of items each

Also some users each taking on a small amount of

Promotion

At least for me, I will be pushing this toward anyone interested

- Business cards, stickers
