

# Meeting 8/2/22

## Working on pagination

- Currently able to get the product list, and you get the entire list
- Work to make sure that we can get a limited amount of products

## Profile

- Refactoring api calls into new folder
- Separate the api calls and react native

## Make Offer Profile

- Backbone is made up
- Object is created once the object is clicked

## Server

- Has static ip address

## Uml for forms

- Fields (ones that are filled in) public private
