

# Meeting Talking points

6/7/2022

## Contacting me times that are at their best

Any time before 10 am and(as for the next couple of weeks it will be after 7, except for one the weekends that would be 9.

If something is super urgent, of course text me right away

but if not urgent and within the time 10-7 or -9 (fri-sat-sun) send me an email:

[Jodiceluke@gmail.com](mailto:Jodiceluke@gmail.com)

## Big updates on the backend

Documentation on how to get that started will be up on github as soon as I get a hold of it

Working on connecting the frontend to the backend

As of right now, we have a version of the frontend that works with the information that you can make on the backend. It displays HELLO - TAG NAME something like this with some of the information that is associated with your account

## Updates on the frontend

(small styles fix for the register)

I would like ot have it so that the pages will flow together

## Starting next week, 6/14/2022

We are going to try and work together over google meets for about an hour at least to allow us to have the chance to touch base and make sure that people are there to help if we have any questions that could be answered during that time

## More front end stories

I will be pushing out more frontend stories to make sure that the frontend is going to be at around the same point in completion as the backend or around it

Any questions or comments from the people that did not attend  
the meeting please let me know

Luke over phone or email or slack or whatever you want to use ;)
