Jul 24, 2022 | 📅 Factoring Meeting

Attendees:
Noah, Teddy, Eddy, Ryan, Luke
Notes

- Merge changes from Dev-Auth → Main
- Reviewing website
- Changes searching by user handles
- Encouraging the users to make sure that they have unique handles
- Looking into using Ajax for Tokening for session Auth

Styles for Sello:

 For right noweach file will contain its own styling. Due to this, we will make a file that will contain the styles and the details for them. It will have the following format

Name of the style(name should be camelCase)
What it should be used for if anything
Description of purpose of style is used for
A list of what the styles will look like

EX.
pageHeader
Text or <Text>
This should be used to allow the user to be able to see what the page that they are on is

```
pageHeader: {
        fontSize: 40,
        padding: 10,
        margin: 5
    }
```

Action items

 These Items are based on issue #12 in Repo for Sello

- [ ] Merge Changes into main
- [ ] Component Files
- [ ] Code indentation
- [ ] Imports
- [ ] Stylesheets
- [ ] Naming Consistency
- [ ] Comments
- [ ] Documentation
